Samuel M Contreras, in his capacity as Division Head of the Water Resources Management Division of Bureau of Soils and Water Management in the Philippines, supervises the planning, design and implementation of small-scale water resources development projects primarily for agricultural purposes. He prepares plans, standards and guidelines related to water resources development programmes of BSWM. At present he is also working as a Field Project Coordinator in the projects on crop production and groundwater management. He is the Chairman of National Technical Working Group on the formulation of guidelines on wastewater reuse for irrigation and other agricultural purposes

He graduated in Science of Agricultural Engineering from G. Araneta University Foundation and post-graduated in Applied Science in Natural Resources from the Lincoln University, New Zealand.

During his long career of twenty-four years, he has worked as Agricultural Engineer, Chief Agriculturist and Soil Technologist. He has been actively involved in various national and international projects on agriculture, integrated watershed management, irrigation, soil, sustainable water management and water resources assessment. He has participated in numerous national and international workshops, seminars and training programmes on agricultural science, irrigation performance, wetland management and environment conservation. He has also presented a few papers in these seminars. He has received many awards and prizes for his outstanding achievements.
